Dear George:

Enclosed is a proposal covering the weight reduction study on System 2. This proposal should have been forwarded to you in August but was inadvertently overlooked at that time; although, we did advise you separately of the cost and it was funded in the contract.

Sincerely,

Dean

STATEMENT OF WORK
SYSTEM 2 WEIGHT REDUCTION STUDY

The Contractor proposes to supply engineering services necessary to conduct a study of design changes necessary in the System 2 airborne equipment to reduce the over-all design weight. The study will determine the most promising alternatives for weight reduction, the multitude of development work required, the effect of changes on system performance, and the net weight reduction possibility. Recommendations for redesign work will be outlined.
